# EmbargoPlus

**early warning network**

**Safeguard your business and streamline underwriting processes with EWN's enhanced EmbargoPlus, providing real-time embargo management and precision risk insights.**

Building on nearly a decade of experience in delivering reliable embargo services, **EmbargoPlus** represents a significant evolution of EWN's standard offering. Designed specifically for insurers, this advanced solution provides expanded capabilities to intelligently manage policy quote requests and internal embargo records in real-time. With seamless integration into existing systems, **EmbargoPlus** equips insurers with the tools they need to make precise, informed decisions with speed and efficiency.

**EmbargoPlus** offers new and enhanced features beyond our standard service, including:

- Real-time GNAF-based lookups for instant policy verification, ensuring fast and accurate results at the point of quote.
- Embargo event ingestion by postcode or polygon, providing superior accuracy for geographic precision.
- Threat event investigation tools, enabling insurers to assess evolving risks through multi-stage embargo alerts.

With EWN's trusted expertise and innovative technology at its core, **EmbargoPlus** empowers insurers to proactively manage embargo processes, stay ahead of emerging threats, and streamline their overall risk management strategies like never before.

## EmbargoPlus Key Features

**Expanded Event View**
Gain oversight of multi-stage events with event sequencing, enabling full automation of your policy engine's embargo process.

**Enhanced API Functionality**
Retrieve key information effortlessly, customise queries for event filtering, and streamline post-event investigations.

**Improved Quality and Ease of Use**
Perform fast, GNAF or coordinate checks at quote time, optimised for seamless quoting system integration.

**Comprehensive Policy Quote Validation**
Validate embargo status instantly with real-time lookups, supporting geographic searches by GNAF, Lat/Lon, street address, polygon, postcode, suburb, or LGA.

# Advanced Embargo Technology

**EmbargoPlus** empowers insurance agencies to mitigate risk, streamline operations, and enhance customer experiences by providing real-time embargo management and precise location-based insights. With instant GNAF-based lookups, insurers can make faster underwriting decisions, avoiding high-risk policies during severe weather events and reducing exposure to fraudulent claims. The automation of embargo processes eliminates manual checks, improving efficiency while minimising errors and operational overhead.

Compliance with regulatory requirements is ensured through detailed event tracking and transparent audit trails. By integrating seamlessly with existing systems, **EmbargoPlus** delivers a smoother customer journey with faster quote processing and accurate, up-to-date geographic data.

| Standard Embargo | EmbargoPlus |
|---|---|
| Embargo by postcode | Embargo by property |
| View single embargo alert at a time | View all embargo alerts issued in a multi-stage event on one screen |
