

Embargo Service

Our industry-leading embargo alert system offers unparalleled support to insurance companies, effectively mitigating risks and ensuring asset protection.

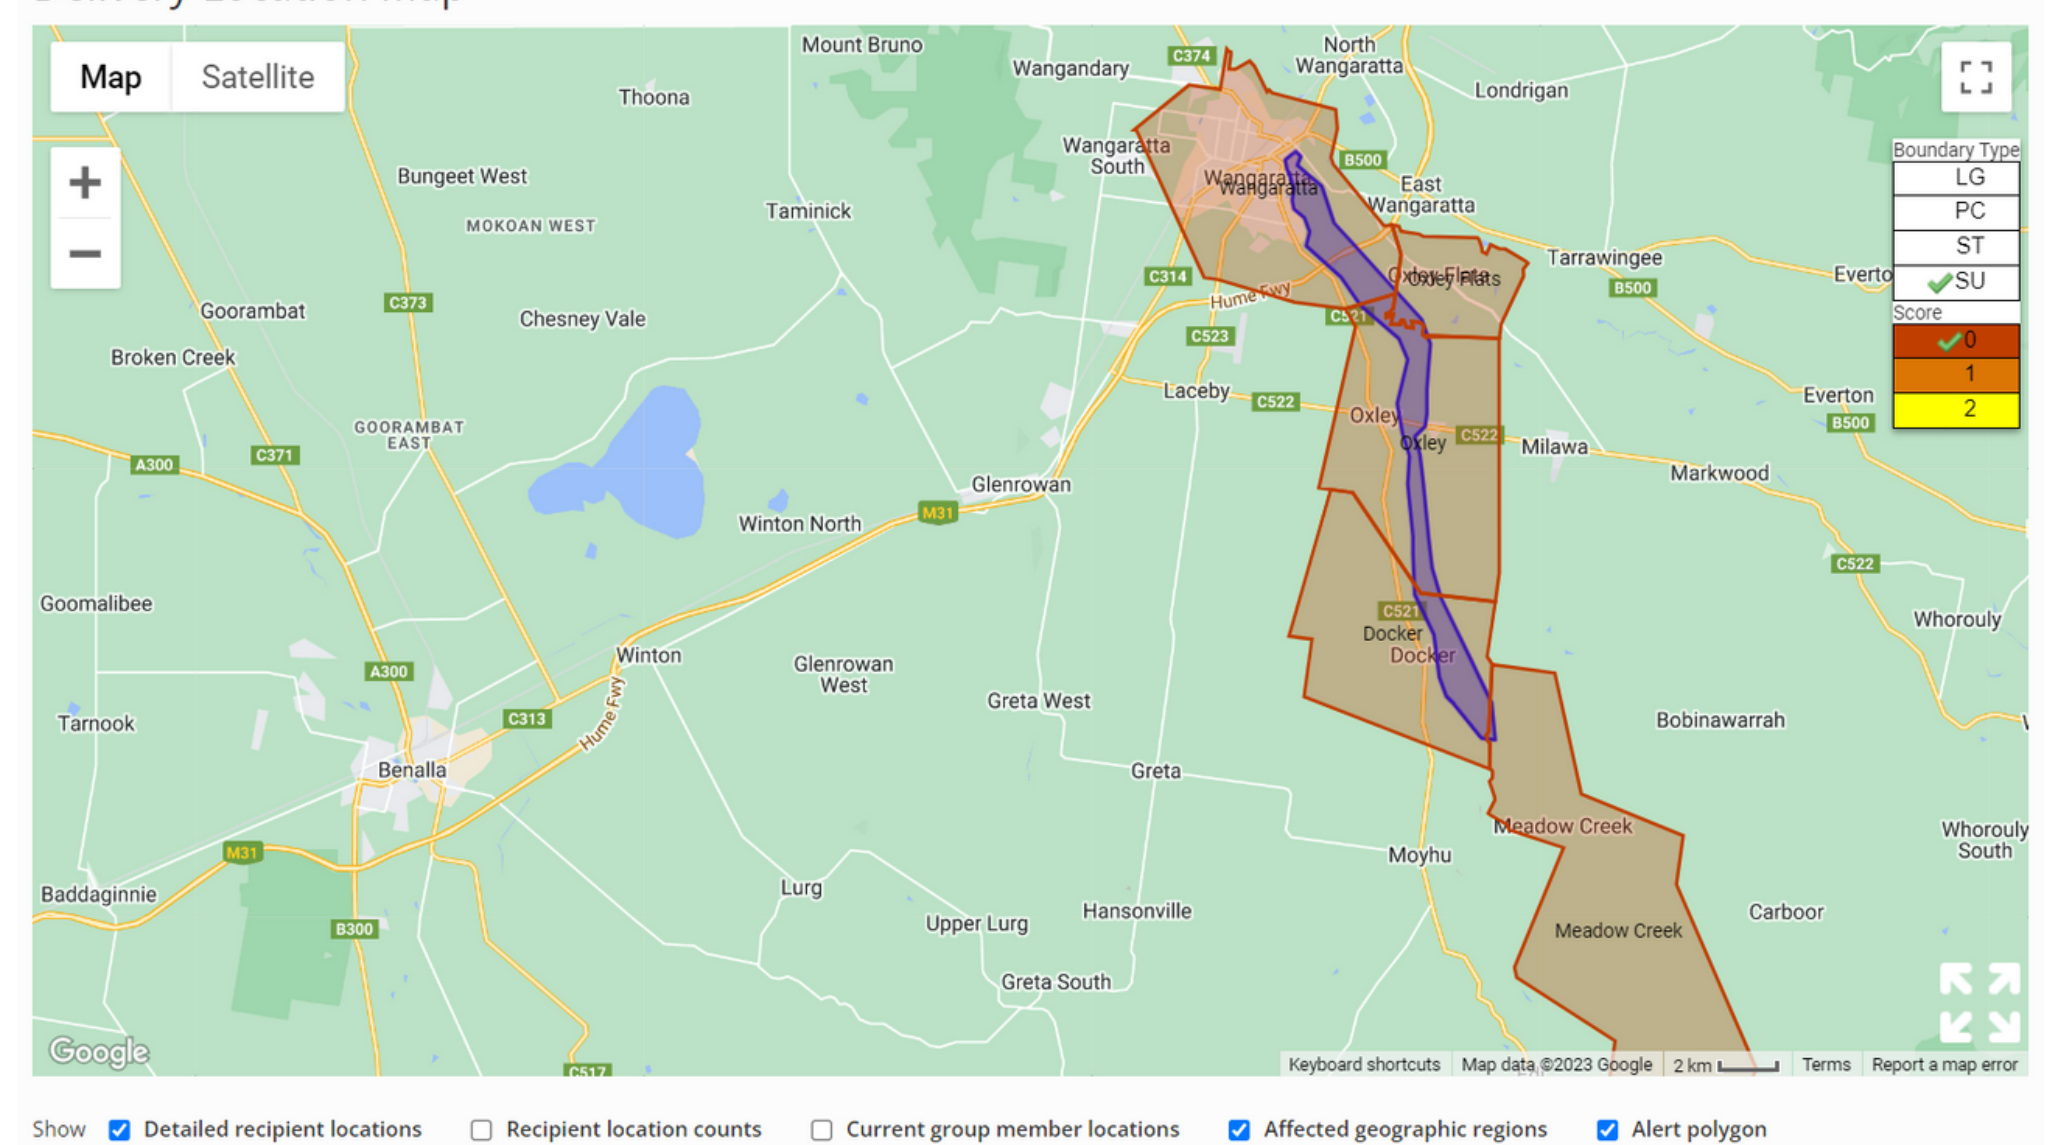

Utilising extensive meteorological data, we provide immediate and pinpointed alerts for imminent severe weather events for your operations — down to the number of dwellings likely to be impacted. This enables you to swiftly implement temporary insurance policy embargoes in the affected postcodes, suburbs or severe weather polygons.

With our embargo alerts in place, your team can mitigate severe weather insurance losses and maximise new policy sales throughout the duration of severe weather events with confidence.

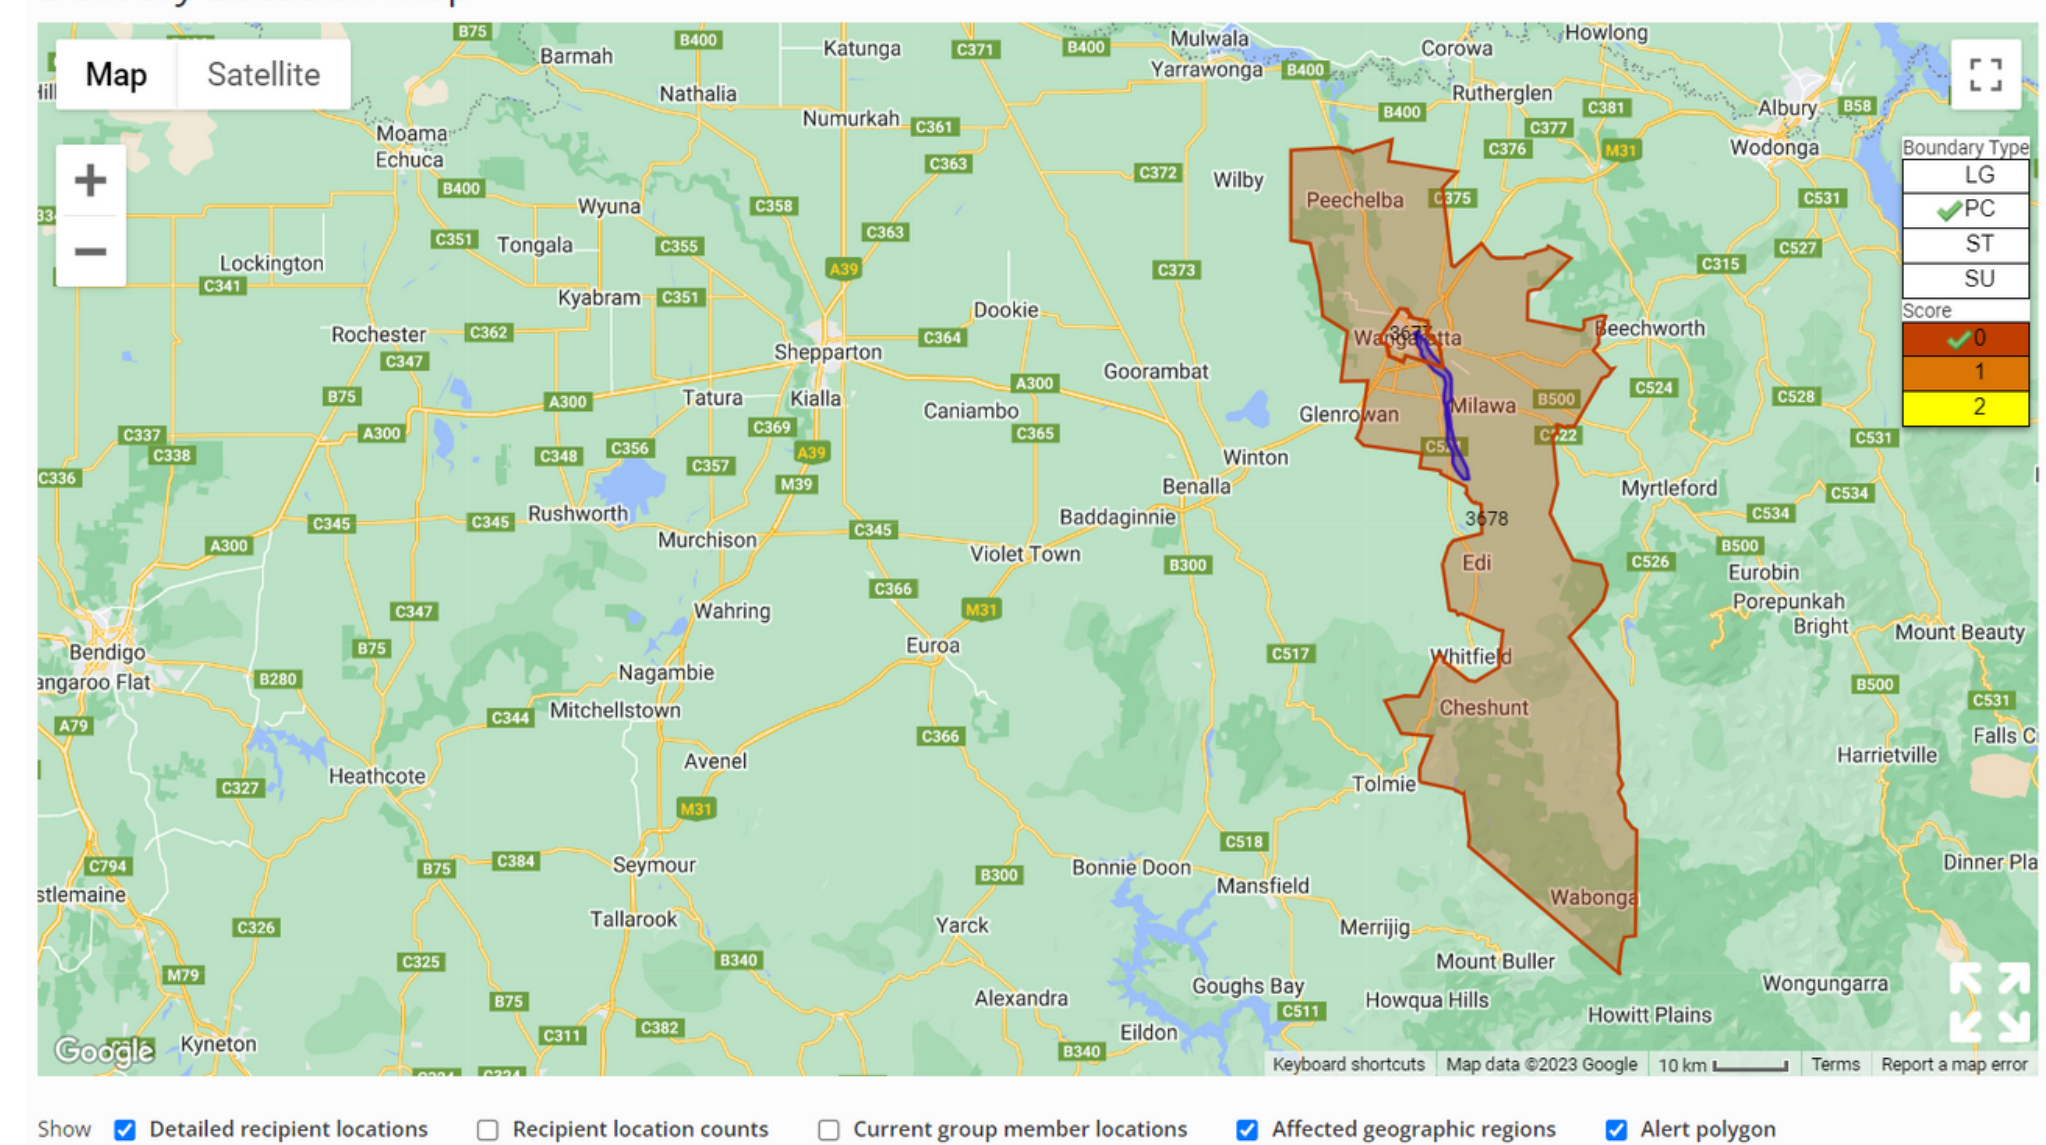

EWN Embargo Key Features
